

# Discover what's new in Studio 7

Contact your distributor to upgrade to our latest proprietary software—today!

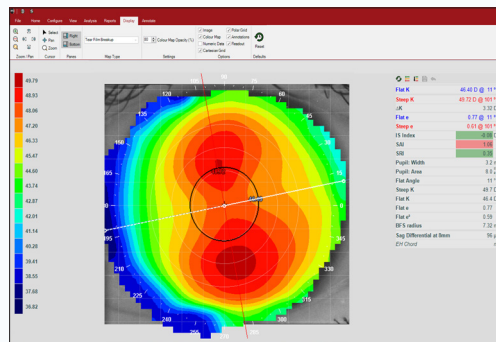

## Upgrade now to step-up your workflow and improve your patient insights.

Studio 7 is full of exciting new features and beneficial updates for your Medmont instruments. Experience improved performance, enhanced functionality, and an optimised user interface. E300 users can also utilise new contact lens attributes and lens brands, including MOONLENS® with OTZ™ technology by KATT Design Group for modern myopia management.

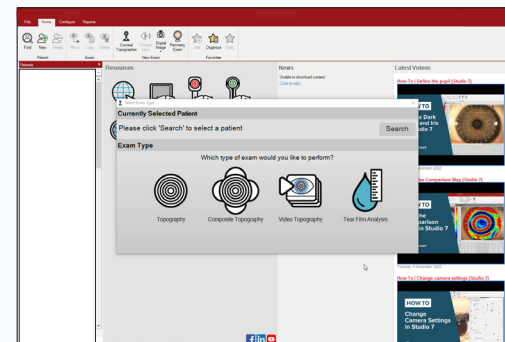

### Do more, faster.

Powerful 64-bit processing supports larger video files, new database search options boost efficiency, and you can save zoomed areas in live capture mode.

### Maximise your capabilities.

Extract more value from your instrument thanks to new functions and attributes designed to provide you with more meaningful insights.

### Enjoy a tidier workflow.

Easily navigate your workflow with modern, user-friendly graphics and icons, along with easily accessible user manuals and training videos.

Contact us to learn about the updates specific to your instrument and current Studio version.
